- ❖ Get Admission in Top Medical Universities of Philippines at affordable tuition fees TODAY!!!

Affordability - Philippines is much more affordable when it comes to yearly fees of the universities & other expenses.

Placement Options - Philippines is the largest provider of medical trained nurses and doctors to the U.S.A, Canada and many other countries thus giving an assurance of jobs and the level of trust other countries have on students who have passed out of Philippines universities.

Superior quality of the educational system - In Philippines, the teachers are not only fluent in English, but they are US educated.

Philippines - Philippines is also known as Republic of Philippines is an archipelagic island of Southeast Asia located in the Pacific Ocean. It is known for its rich biodiversity and abundance in natural resources. It is considered to be twelfth populated country in the world. The country is home to people from different ethnicity and cultural background. Manila is the capital of the country and Quezon City is the most populous city.

History - The country has been a Spanish and American colony in the past. In 1934, the country obtained its Commonwealth status. In October 1945, it became a founding member of United Nations. Post World War II, through the Treaty of Manila, the country was recognized as an independent nation. At present, it follows democratic system, where the constitutional head is the President.

Why Philippines - High quality education, safe and conducive environment and affordable fee structure and other associated expenses are one of the primary reasons for international students to opt for higher education in the country. Apart from this, with a degree of the educational institutes in Philippines, you can explore job opportunities in different countries in the world. Medium of instruction for all these courses is only English.

Why Philippines is better for Medical Education? So long people were only aware of Soviet Russia and China for provision of affordable and good system of medical education. However, Philippines is also rising as one of the top places for providing high quality medical education, at par with the degrees awarded by the universities of the U.S.A and the U.K. Students get the degree of Doctor of Medicine (M.D.) after completing four years degree program which is equivalent to M.B.B.S in India.

In the first year, the basics of medical sciences are taught. From the second year onwards to third year, these courses focus on specialized areas. Fourth year includes clinical rotation in different departments. This degree deals with medical theories, technologies, practices and different approaches for problem-solving.

Degree is recognized by MCI (IMC Act 1956), WHO, GMC, ECFMG, California Board of Medicine, CFGNS, USMLE (USA) & CHED - Govt. of Philippines, UK, Singapore, Canada, Australia, Gulf Countries, whole Europe etc. Graduates can apply for license with Medical Councils of more than 180 countries. After Graduating & passing the screening test in India conducted by the National Board of Examinations, New Delhi students can apply for Government jobs & also join Post Graduation in India.

Comparison MBBS in Philippines & Other countries

Most of students' dream of getting admission in a good government medical school at home or abroad by scoring high in the medical entrance examinations conducted by Ministry of Education but Studying MBBS in the private medical colleges of home-country is very expensive.

Studying MBBS in Philippines, China, Kyrgyzstan and Russia is undoubtedly a good choice for those who want to become good doctors. **There are no capitation fees or donations to be paid to the universities abroad.** The cost of higher education in these countries is highly regulated and subsidized by the Ministry of Education (MOE). They are very reasonable in contrast to universities in other countries. The cost of living is also relatively low compared with studying medicine in India and other countries.

Medical colleges in Philippines, China, Kyrgyzstan and Russia have very small and separate batches for local and international students, where the medium of teaching is English. In addition to affordability, the medical colleges there have robust infrastructure, advanced technology and good living conditions, claim students and doctors.

Studying MBBS in Philippines, China, Kyrgyzstan and Russia is not only less expensive than India, but colleges there also provide better facilities and teaching atmosphere. After the US, UK and Australia, Philippines, China, Kyrgyzstan and Russia are most popular destinations among Indians for a medical degree. "An MBBS in Philippines, China, Ukraine, Kyrgyzstan and Russia can be

a good stepping stone for people who want to become doctors, but do not have the means to do it in India or in other popular destinations such as the US or UK."

However, to be eligible to practice in India, doctors graduating from these universities have to clear a screening examination conducted by the National Board of Examinations under the directive of Medical Council of India.

Philippines

American / US pattern of Education

English is an official language of Philippines with Filipino.

Philippines a former colony of USA & has strong ties with US. 94% of population speaks English. It is the 3rd largest English speaking country.
